Needham - Wellesley

Add-A-Lane Contract V along a Section of Interstate 95 Includes 6 Bridges

Kendrick Street Briefing

March 13, 2015

The Massachusetts Department of Transportation's (MassDOT) contractor for the Route 128 Add-A-Lane Bridge V Contract, Barletta Heavy Division (BHD) will continue to perform overnight demolition work during the third shift on Sunday, March 15, 2015. This schedule will be in place for two to three weeks. Third shift work hours are from 9:00 PM to 5:00 AM.

This work requires the closure of up to two travel lanes on Route 128 northbound or southbound. These lane closures are prohibited between 5:00 AM and 9:00 PM, necessitating the overnight work. Third shift work during this period of time will be located primarily on the Kendrick St Bridge.

Activities during these work hours will include localized demolition of the concrete deck, including jack hammering and saw cutting, and removal of steel. Noise levels will be monitored during the work. BHD will implement appropriate noise control measures as needed. Vehicular travel will be maintained in the current configuration on all local roads.

Work will also continue throughout the project limits during daytime shifts, between 7:00AM-3:00PM. Work will focus on the established Kendrick St work-zone, excavating for the installation of the new bridge and installation of underground utilities. Excavation work will also be performed at Highland Ave. All work will be restricted to within the established work-zones and will not impact the current traffic configuration.

MassDOT continues to perform adjustments to the existing Kendrick St. Bridge. Work will begin to implement additional traffic measures in the form of increased signage, timing adjustments to the traffic signals at Hunting St and 3Rd Ave. MassDOT will also be line striping the Kendrick St. Bridge to accommodate evening commuting traffic in the Westerly direction.

For more information about the project, [visit the website](#). For questions or issues and concerns related to construction, please email the project at NW195@dot.state.ma.us.
